16. Introduction of new line items and changes in accounting policies

Total Group transactions

From the fiscal year ending March 31, 2016, Total Group transactions has been introduced as a new line item to display the Group's growth capacity. This line item is the total of transactions for all businesses, and thereby represents the amount of money used by customers on the MARUI GROUP's products and services.

- | | | |
|--------------------------------|-------|---|
| •Retailing and store operation | ***** | Total sales including product sales by the Company and rent revenues and others from tenants |
| •Credit card services | ***** | Card shopping transaction volumes, cash advance transactions, rent advances, driver license acquisition support credit, and insurance sales |
| •Retailing-related services | ***** | Sales to external customers |

(Card transactions from retailing and store operation are deducted through eliminations.)

For the Total Group transactions of quarterly figures for the fiscal year ended March 31, 2015, please refer to page 13.

Changes in accounting policies

(Display of net value for total operating revenues for consignment buying)

In retailing and store operation, the Company utilizes the consignment buying system in which products are procured from suppliers at the same time they are sold to customers. Previously, sales and cost of sales related to consignment buying was displayed at total value. However, based on a comprehensive evaluation of the content of the 13th research report issued by the Accounting Standards Committee of the Japanese Institute of Certified Public Accountants (an interim report on the recognition of revenues in Japan), the Company has decided to display sales from consignment buying at net value, the portion that represents income to the Company, beginning in the fiscal year ending March 31, 2016. This decision was made based on the fact that consignment buying transactions do not entail the serious inventory and other risks that are associated with normal transactions.

In response to changes in the consumer market environment, the Group has been moving away from its traditional consignment buying-centric business model in accordance with the medium-term management plan. As part of this transition, Marui is developing its own unique style of shopping centers, and these efforts will be accelerated going forward. The Company plans to institute the aforementioned change in display method in response to the need resulting from this transition to display business performance in a manner that is more appropriate for measuring the medium-term management plan's progress and to increase the viability of total operating revenues as a management indicator.

(Change in line item name)

Based on this change described above, the line item that was previously "total operating revenues" will be displayed as "revenue."

(Change in method of calculating cost of sales)

In conjunction with the shift in business model for retailing and store operation, the Company has been concluding fixed-term rental contracts with tenants. Previously, fixed costs associated with tenants, such as depreciation and amortization related to stores, had been deducted from rent revenues in the form of cost of sales. From the fiscal year ending March 31, 2016, fixed costs associated with tenants under contracts that entail the incurring of percentage rent will be recorded under SG&A expenses. This decision was made to conform with the treatment of costs associated with the abovementioned consignment buying system, which are also recorded under SG&A expenses, as well as to more clearly display business performance.

(Restatement of figures for the fiscal year ended March 31, 2015)

The abovementioned changes in accounting policies have been applied retroactively, and figures for the fiscal year ended March 31, 2015, have been restated to reflect the changes in display method. For restated quarterly figures for the fiscal year ended March 31, 2015, and information on the impact of these changes, please refer to page 13.
